

Quality Control Consultant Charlottetown, PEI

Introduction

We're hiring a Quality Control Consultant for our client, a global pharmaceutical company, to join their team. This is a 1-year contract opportunity.

Responsibilities

- Responsible for all analytical aspects of a key tech transfer project, including but not limited to method transfer, Design and development, Execution, and Project management
- The candidate must be highly skilled in running multiple projects through to completion, in a timely manner.
- Lead projects related to testing for method validations
- Role includes preparation/review of protocols, testing, data review and analysis, troubleshooting, training QC analysts, and preparation of final reports
- Development and optimization of ELISA assay
- Work directly with other teams, such as R&D, TSMS, manufacturing and QC in troubleshooting investigations, or other projects as required.
- Ensure qualification, calibration and maintenance of QC Equipment
- Recognize, report and support OOS and deviation investigations, related to the method development and validation
- Ability to handle non-standard requests with little oversight

Requirements

- BSc or MSc (or equivalent)
- Subject matter expert in ELISA development and validation
- An ELISA expert with at least 5 years of ELISA design experience
- Ability to work within the company Quality systems (Veeva, SharePoint, etc.)
- Strong analytical and laboratory skills
- Ability to prioritize activities and shift focus to respond to fluid needs
- Excellent time management skills, communication skills and technical writing skills
- Proficiency with business applications such as; Adobe, MS Office, JMP, Excel, and PowerPoint
- GMP experience
- Must be able to work overtime as required
- Requires ability to stand for long periods of time
- Must be able to read, write, understand, and comply with appropriate standard operating procedures.
