Director, Bacteriology

Saskatchewan Health invites applications from candidates with superior technical, analytical and managerial skills to provide leadership to bacteriology staff in the Saskatchewan Disease Control Laboratory (formerly the Provincial Laboratory) in Regina, Saskatchewan, Canada.

You will provide leadership in the development, implementation and maintenance of laboratory standards, methods and procedures. Expertise in implementing public health laboratory testing, developing approaches to the detection of new bacterial, fungal and parasitic pathogens, and designing protocols and algorithms for outbreak investigations is essential. The successful candidate will advise clinicians and laboratories in Saskatchewan on the diagnosis of infections.

This position requires the skills and knowledge developed through a graduate degree program and appropriate training in clinical and/or public health laboratories, and the successful candidate will hold advanced certification appropriate to their qualifications, from the Canadian College of Microbiologists or the American Board of Medical Microbiology or the American Board of Medical Laboratory Immunology, or be eligible to sit the exam.

This is a 12 month, fixed term position. The expected starting date is November 1st 2011.
