

Humber River Hospital. Lighting New Ways In Healthcare.

Humber River Hospital (HRH) is one of Canada's largest acute care hospitals, fully digital, and serving a diverse catchment area of more than 850,000 people in the northwest Greater Toronto Area. HRH operates 722 acute inpatient beds with 3,400 staff, approximately 700 physicians, and over 1,000 volunteers. HRH currently includes the Wilson site, a 656-bed full service acute care facility that opened in 2015, and the Finch and Church sites, known as the Reactivation Centres (RCC). The RCC represent a unique partnership among multiple hospitals in the GTA with a focus on high quality patient recovery. A 356-bed Long Term care facility "Humber Meadows" is currently under construction at the Finch Avenue site.

Our vision of Exceptional care, Healthier community and our focus on equity and inclusivity is something we share with our partners at the North Western Toronto Ontario Health Team. As Canada's first digital hospital and home of the first Patient Care Digital Command Centre, a commitment to innovation, research, and academic excellence remains at the core of our organization. We look forward to further development of these core elements through our membership in the Toronto Academic Health Sciences Network (TAHSN).

As an associate member of TAHSN, Humber River Hospital provides many academic opportunities to all professions. We are committed to establishing a Family Practice Teaching Unit in partnership with the University of Toronto within the year, further strengthening our commitment to academia. The Hospital has formal affiliations with medical schools at University of Toronto and Queen's University.

HRH has a strong emphasis on quality, safety, and the patient and family experience. In 2018, HRH received Exemplary Standing from Accreditation Canada. HRH also recently received the Studer Group Award for Excellence in Canadian Patient Care and the Canadian Council of Health Service Executives Patient Safety Award.

The Hospital has developed short and long-term objectives outlined in the 2021-23 Strategic Plan with a core direction of advancing HRH as a community academic hospital. Examples include:

- Growing targeted specialty programs that are responsive to the needs of our community
- Establishing an HRH Digital Healthcare Research Institute
- Continuing to shepherd the development of a long-term care facility
- Establishing a comprehensive Medical Education Program

EXCELLENT CAREER OPPORTUNITY

Right now we are looking for a:

MEDICAL MICROBIOLOGIST OR PHD IN CLINICAL MICROBIOLOGY

The Department of Pathology and Laboratory Medicine, Division of Clinical Microbiology and the Department of Medicine is seeking a **0.8 to 1.0 FTE Medical Microbiologist or PhD in Clinical Microbiology**. The Humber River Hospital Laboratory is ISO 15189 accredited, with a total testing volume of 5.5 Million tests/year, that includes 630,000 tests/year in Microbiology.

Reporting to the Chief of Pathology & Medical Director, Laboratory Medicine and to the Chief of Medicine, the successful candidate will be a highly motivated individual with demonstrated professional skills in diagnostic microbiology (including molecular microbiology), able to work in a team environment, and have excellent interpersonal and communication skills. The candidate will be required to provide microbiology consultation services in both clinical and laboratory settings, laboratory and technical expertise, and strategic guidance in Microbiology and molecular diagnostics. The candidate should have experience in a high volume setting with similar case complexity. In addition, it is expected that the successful candidate will be engaged in the evaluation, development, and utilization review of laboratory testing, and

provide support for infection prevention and control. Experience in laboratory management including quality assurance, epidemiology and data analysis would be an asset.

Applicants must hold either:

- An MD and fellowship from the Royal College of Physicians and Surgeons of Canada in Medical Microbiology or equivalent and be a member of, or eligible for membership with the College of Physicians & Surgeons of Ontario.
- PhD in Microbiology from a Canadian University or an equivalent qualifying degree from a recognized institution required: Certification with the Canadian College of Microbiologists required.

If you are interested in this exceptional opportunity, please forward a letter of interest along with your curriculum vitae by **September 30, 2022** to:

Dr. William Dubinski
Chief of Pathology and Medical Director, Laboratory Medicine
Humber River Hospital
1235 Wilson Avenue
Toronto, ON M3M 0B2

Send via E-mail: wdubinski@hrh.ca

Interested candidates who qualify will be contacted and may be asked to attend a pre-application interview. Selected candidates will be invited to submit a formal application for these positions. The hospital reserves the right not to appoint anyone to these positions.
